Docket No.: 7760-012

Filing Date: 06/12/00

Detailed Office Action

Status of the Claims

Acknowledgement is hereby made of receipt and entry of the communication filed 27 April, 2005. No amendments accompanied the response. Claims 7, 24, and 25 are currently under examination.

35 U.S.C. § 112, Second Paragraph

Claims 7, 24, and 25 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Two separate requirements are set forth under this statute: (1) the claims must set forth the subject matter that applicants regard as their invention; and (2) the claims must particularly point out and distinctly define the metes and bounds of the subject matter that will be protected by the patent grant.

Claim 7 is vague and indefinite since it fails to specify the scientific objective of increasing Th1, or decreasing Th2, cytokine levels. What purpose does the modulation of cytokine levels serve? ~~Applicants should amend the claim language to include an~~ appropriate correlation between the modulation of cytokine levels and some desired outcome. Claim 25 is also vague and indefinite for referencing a group of Th2 cytokines that includes IgG. IgG is clearly not a cytokine, but rather an immunoglobulin molecule. Appropriate correction is required (i.e., A method for modulating the immune response in an individual who is not infected with an immunodeficiency-type retrovirus comprising administering an effective amount of a T-cell receptor (TCR) V β complementarity determining region-1 (CDR-1) peptide consisting of the amino acid sequence Cys Lys Pro Ile Ser Gly His Asn Ser Leu Phe Trp Tyr Arg Gln Thr (SEQ ID NO.: 1) to said individual wherein said administration results in increased expression of at least on Th1

cytokine or decreased expression of at least on Th2 cytokine and immunoglobulin G (IgG)).

35 U.S.C. § 112, First Paragraph

The following is a quotation of the first paragraph of 35 U.S.C.

§ 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The previous rejection of claims 7, 24, and 25 under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention, is hereby withdrawn in response to applicants' arguments.

Allowable Subject Matter

Claims 7, 24, and 25 appear to be free of the prior art and would be allowable with appropriate revision of the claim language as suggested *supra*.

Correspondence

Any inquiry concerning this communication should be directed to Jeffrey S. Parkin, Ph.D., whose telephone number is (571) 272-0908. The examiner can normally be reached Monday through Thursday from 10:30 AM to 9:00 PM. A message may be left on the examiner's voice mail service.
